Your skin condition is our 1st ingredient

Every skin is different—so how deeply can mass-produced cosmetics truly understand individual skin needs?

Lillycover began with this fundamental question, reexamining conventional approaches and translating overlooked skin differences into technology-driven, precision manufacturing.

LILLYCOVER CEO & Founder An Sunhee

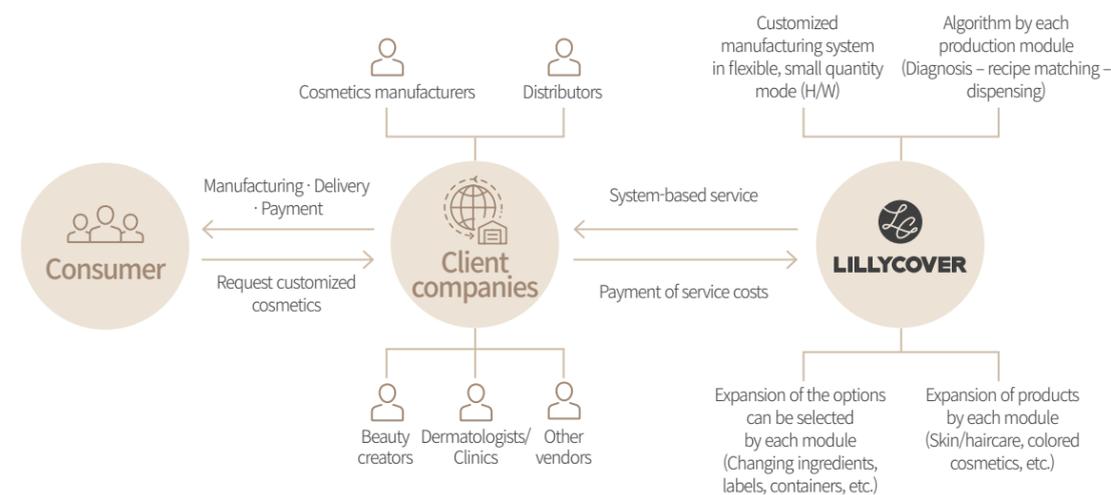

Lillycover Co., Ltd. is an innovative BeautyTech company recognized for its outstanding technology in providing advanced skincare services and customized cosmetics optimized for individual skin needs. Beyond the domestic market, we collaborate with global companies and institutions to expand the boundaries of skin science and technology, offering innovative beauty solutions.

One Customized Business

Beautiful, uniquely yours. Driven by an ongoing pursuit of skin's true nature, we provide hyper-personalized solutions powered by precision technology.

Understanding the skin changes every day and the skin languages The beauty-tech starts from the technology of LILLYCOVER

Lillycover is a BeautyTech company delivering hyper-personalized cosmetic services through the convergence of ICT and Bio Technology. Powered by over 510,000 skin and scalp data points and AI-driven analytics, Lillycover operates an integrated system connecting diagnosis, customized prescription design, real-time formulation, and ongoing care. With a compact, space-efficient formulation system

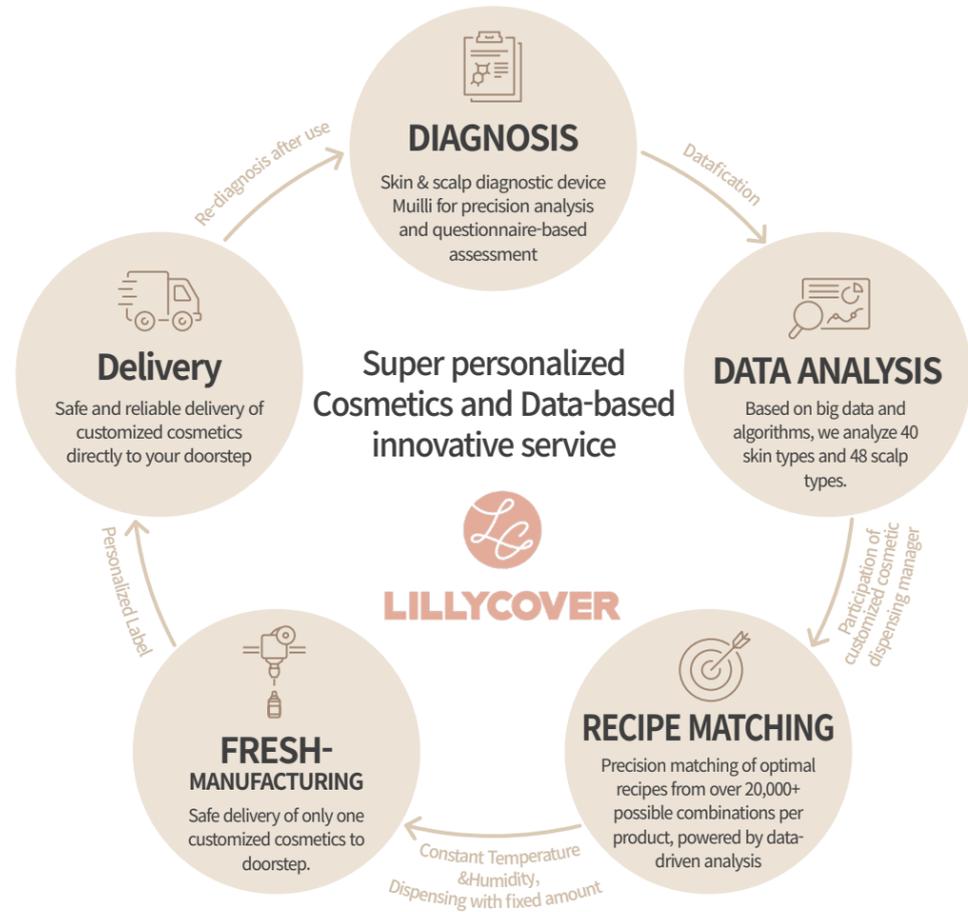

and standardized processes, the solution enables fast deployment and scalable operation across diverse B2B environments, including medical clinics, aesthetic centers, and beauty brands—while establishing an O2O personalized beauty model that extends beyond product sales to continuous skincare services.

Why LILLYCOVER?

<p>High-precision skin and scalp analysis using 60× magnification camera diagnostics</p>	<p>Personalized recipe optimization based on extensive skin data analytics</p>	<p>Simplified manufacturing processes through automated formulation systems, enhancing overall customer experience</p>
<p>Hygienic and safety-compliant formulation systems enabling fresh, on-demand production</p>	<p>Four types of formulation systems supporting diverse product business models</p>	<p>One-stop personalized solution covering the entire journey—from diagnosis to customized cosmetic subscriptions</p>

One Customized Technology

Research on Individual tendencies and preferences through ICT
 Realization of genuine customized cosmetics by optimized customizing

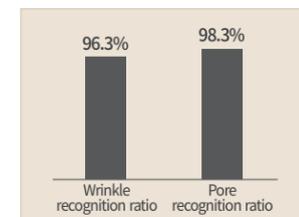

The perfect combination of super personalized service and data based service

Diagnostic accuracy 98.3%

Expert-validated self-diagnostic assessment built on patented technology

*Patents for skin diagnostic methods, skin diagnostic devices, and recording device (No. 10-2139801)

A skin and scalp diagnostic device that delivers precise condition analysis and defines personalized care standards

- ☑ Easy and convenient diagnosis at home by connecting your phone or table PC
- ☑ Smart diagnosis method through big data collected and algorithmized regardless of gender, age, race.
- ☑ 60x magnification system enables accurate analysis of the data.
- ☑ Measurement of skin moisture level through microcurrent of impedance sensor
- ☑ Facial Diagnosis items : Redness, sensitivity, moisture, wrinkles, pores, pigmentation
- ☑ Scalp diagnosis items : Redness, moisture, dead skin cells, forehead width, hair thickness, hair per pore, pore density

- Size • 52.8 x 34.7 x 174 (mm)
- Rated voltage • 3.6V
- KC certification • Compliance Certification R-C-LCV-LC-200
- FCC Certification • Compliance Certification 2BFGZLCM-01
- Weight • 140g
- Power consumption • 300mA

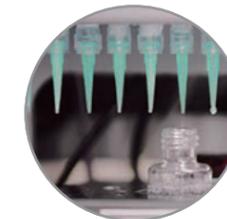

Customized cosmetics manufacturing system

ENIMA™

- ☑ Manufacturing system customized cosmetics in flexible mode
- ☑ Based on over 510,000 data points collected through skin diagnostics, the system identifies the ingredients each user needs by classifying them into one of 40 skin MBTI types
- ☑ Manufactured customized cosmetics with fixed amount by IoT system and robot in sterilized environment by plasma in within 3 minutes and 50 seconds
- ☑ Each product can be manufactured with approximately 20,000 different recipes.
- ☑ Freely changeable to bespoke recipes according to personal preferences.

Dispensing process utilizing a robot Simplified process with minimized pollution
*Cap separation, raw material supply, sub raw material connection, etc.

Quantitative dispensing and instant manufacturing using an IoT system

Hygienic environment maintained through regular plasma sterilization, disinfection, and constant temperature/humidity system

Air conditioner operates according to set temperature through automatic temperature control

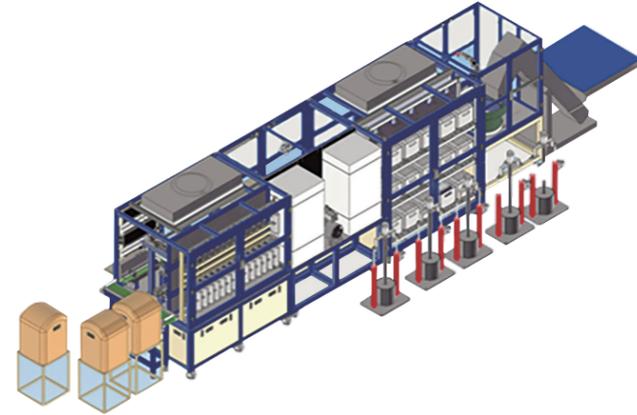

Planetary Mixer makes stirring of high-viscosity raw materials possible in a short time

Product name	Custom cosmetic manufacturing system, ENIMA	Cycle time	3 minutes 50 seconds
Size	1400 x 1400 x 1950 mm	Dispensed products	Facial care line (toner, essence, lotion, ampoule, etc.)
Product weight	1,000kg	Ingredients loaded in the machine	40 units of 1L 10 units of 500ml
Viscosity available for dispensing	6,000-10,000 cP	Daily production capacity (8 hrs per day)	120 bottles (15ml)
MOQ	1 Unit		

A factory-type system for mass production of multiple product varieties and customized cosmetic formulation

ENIMA Super™

- ✓ Mass production of high-viscosity products
- ✓ Possible to combine not only facial products, but also hair care products based on personalized recipes
- ✓ Monitoring of production line and automated order/ingredient management through automatic container transfer, automatic label attachment and application of MES

BALANX

A journey to uncover answers to skin concerns—
under the name of a single, sustainable
skincare solution, we study the unique skin
essence that belongs to one individual alone.

One Cosmetic Infinite Value

BALANX and ORBIT are Lillycover's customized cosmetic brands, designed around individual skin characteristics and powered by diagnostic technologies based on big data and advanced algorithms.

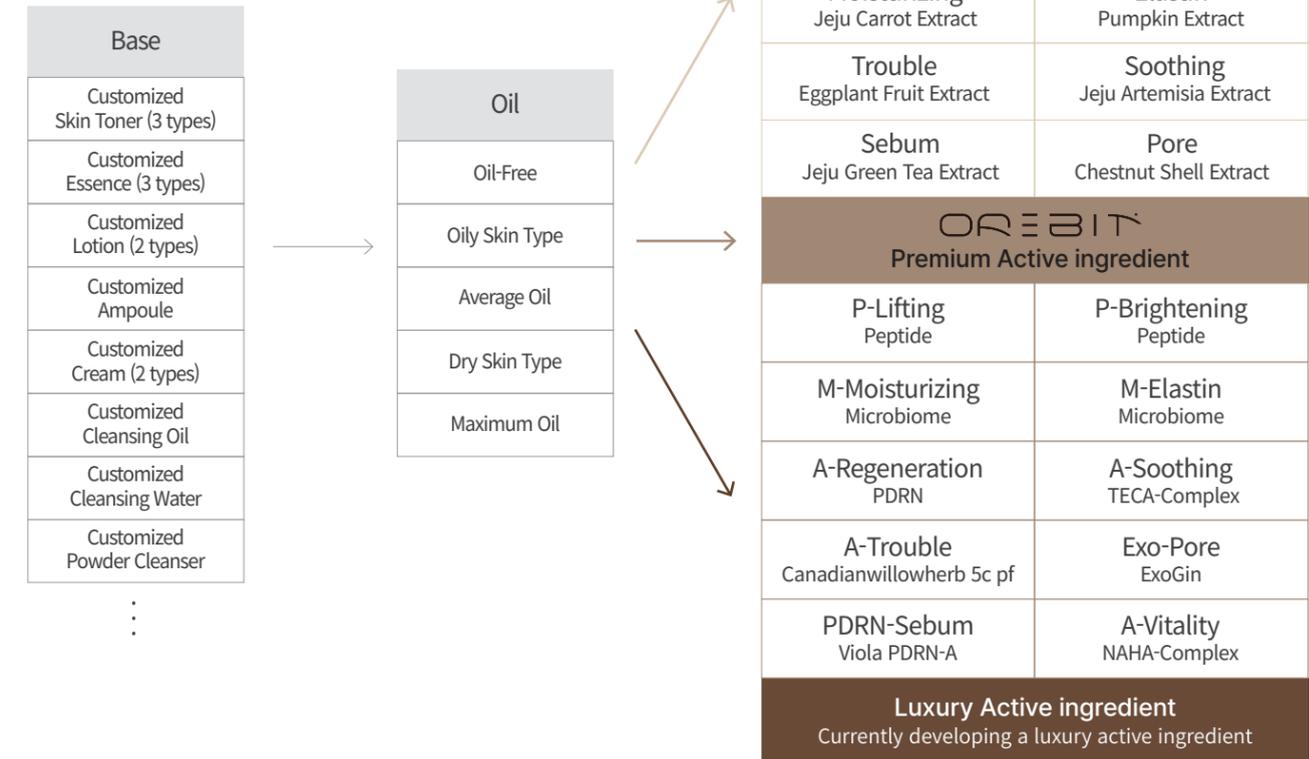

Just as every tree has its own grain,
and every person has a unique fingerprint,
we ultimately focus on the essence.

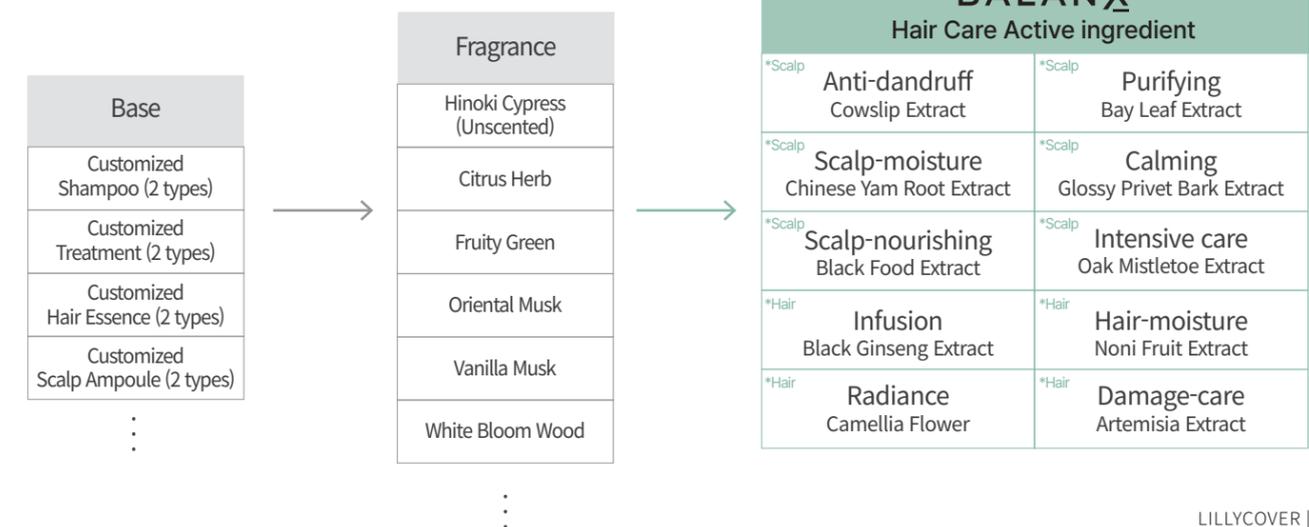

Just as every person has a different personality, every skin has its own unique character. Our first and most essential ingredient is your skin data. Through diagnostics and analysis powered by big data and advanced algorithms, Lillycover delivers the optimal combination—customized cosmetics precisely tailored to each individual's skin.

FORMULATION PROCESS

Customized Skincare Products

Customized Hair Care Products

Light / Medium / Heavy (3 base types)
Volume: 100ml, 250ml
